GOMPERS ANSWERS ALLEN'S QUESTION  
Says Public Has No Rights Superior to Those of Workers to Protect Themselves.STANDS BY THE STRIKE  
Asserts Justification Is Found in Results—Accuses Employers and Public Officials.

Special to THE SUN AND NEW YORK HERALD.—Washington, June 6.—Having waited a week to frame an answer to a question propounded to him by Gov. Allen of Kansas in a debate on the labor question in New York, Mr. Gompers, president of the American Federation of Labor, issued tonight a statement to define his position, which, in substance, reaffirms the right to strike.

Here is the question asked by Gov. Allen: "When a dispute between capital and labor brings on a strike affecting the production or distribution of the necessities of life, thus threatening the public health and impeding the public interest, is it the right of the public to demand that the strike be ended, or is it a private war between capital and labor?"

"If you answer the question in the affirmative," Mr. Gompers, how would you defend the right of the public to demand that the strike be ended?"

"And, in addition, I wish him to define for us, if he will, who had the divine right to forbid the workmen to strike their 'outlaw' strike, who controls this divine right to strike work?"

Prefacing his reply with the assertion that the language of the question is "improper," Mr. Gompers said:

"The strike is the only effective weapon by which the workers may consider the question of their own rights. It is the use of which entails serious consequences, but the question of life is the question at issue, is a serious question. It is much more serious to strikers than it is to Gov. Allen. The freedom of workers in enjoyment of the right to strike means the freedom of men to make life better, happier—the right of men to elect the whole tone of society and to force abolition of abuse, injustice and oppression.

"There is no denial that strikes of magnitude temporarily disturb the public. But public strikes affecting production or distribution actually threaten to public peace and fewer become a menace to the public health. Strikes in which there has been a threatening of the public peace usually have been strikes in which employers, or public officials influenced by employers, have threatened the breach of peace by the use of thugs, armed guards and detectives. The necessity for order and obedience to laws governing conduct is impressed upon every strike. The workers are strikers. The conscience of employers and of officers of the law has frequently been clear.

"Labor has no desire to cause inconvenience to the public of which it is a part. The public has no rights which are superior to the right to live and to his right to defend himself from oppression. It is the right of the public to be concerned, the right to strike must be and will be maintained, not only as a measure of self-defense and self-protection, but as a measure necessary to public progress.

"The first step toward conservation of the rights of the public lies in a real and intelligent understanding of the problems by all of the people and in the possession of that understanding the people will see that public and general welfare cannot be conserved by denying fundamental liberties to the members of society.

"The right to strike, with all its disadvantages, is an agency of progress, a buttress of mankind of health and vigor, a promoter of public thought and opinion—an instrument for good, democratic in concept and essential to freedom. Its retention and justification is found in its results."

So far as labor is concerned, the right to strike must be and will be maintained, not only as a measure of self-defense and self-protection, but as a measure necessary to public progress.

The first step toward conservation of the rights of the public lies in a real and intelligent understanding of the problems by all of the people and in the possession of that understanding the people will see that public and general welfare cannot be conserved by denying fundamental liberties to the members of society.

The right to strike, with all its disadvantages, is an agency of progress, a buttress of mankind of health and vigor, a promoter of public thought and opinion—an instrument for good, democratic in concept and essential to freedom. Its retention and justification is found in its results."

LABOR PARTY URGED AT A.F.L. CONVENTION  
Fight Expected in Montreal Over Plan for Toilers to Unite for Politics.ALLIES PROTEST ON ARGENTINE DECREE  
Britain and France Object to Stopping Wheat Exports.

Buenos Aires, June 6.—The British, French and Italian Ministers have protested to Foreign Minister Pueyrredon against the decree of the Argentine Government Friday suspending the export of wheat pending enactment of the new wheat duty law recently passed by the Chamber of Deputies and now before the Senate. It was learned today that approximately 100 cargo loaded ships have been held up by the decree, and the vessels are incurring heavy port charges. The order of suspension was based without warning on the grounds that the Minister of Agriculture had been informed by the Argentine Government that their governments are likely to claim indemnification if the decree is not rescinded or the port charges waived. It is believed that the decree was issued to prevent further exports of wheat from Argentina without paying the export duty contemplated by the new law.

It is understood the British, French and Italian Governments, which have contracted for a total of nearly 1,000,000 tons of wheat, are satisfied to have the wheat taxes restored, and that the four persons provided in the Chamber amendment to the duty bill, if the clause of the new measure under which export duties on wheat from Argentina are to be increased to twenty-five per cent of the total they export at a price less than the present market price, will be eliminated in view of the fact that the million tons of wheat contracted for equals nearly all the exportable surplus. It is the position of these Governments that their interests ought to be considered and a less onerous plan devised.

GRIP IS TIGHTENED ON 3,000 SLACKERS  
Criminal Informations Filed Against Them.

NEW YORK, June 6.—United States District Attorney Joseph L. Bodine has filed criminal informations against three thousand men, numbering about three thousand, with the Clerk of the United States District Court here to bring the cases within the statute of limitation.

Mr. Bodine announced that immediate arrests will not be made, but that each case will be investigated, and where there has been a failure to file out a questionnaire, report for physical examination, or report to a military camp, prosecutions will follow.

The United States District Attorney stated that the list contains the names of many men who undoubtedly have been excused and said that when this list has been verified they will not be prosecuted. Where it is found that men have evaded the draft, however, arrests and prosecutions will occur.
